characteristics varnish finish

A varnish finish is applied once. With varnish you can choose between a matte, satin or high-gloss finish. An advantage of varnish is that it is more resistant to moisture. A disadvantage is that it cannot be retouched.

characteristics oil finish

An oil finish has a very natural look and is soft in tone. The oil finish also nourishes the wood and can therefore be retouched. A disadvantage of an oil finish is that it is less water resistant and has to be applied after some time.
